

Master the 'Cross' wind

This is one of the four seminars available to attend at the Maryland Regional Festival of Flight. Crosswind landings are an important pilot skill. This is a review of the problem and the skills needed. As a Designated Pilot Examiner, John Cutcher unfortunately has seen too many pilots who are lacking in proper skills for dealing with crosswind landings. This is an opportunity to learn from his experience.

Directions: To drive in, follow the map directions to the AOPA Headquarters building at the north end of the airport. Park in the lot behind the building and enter through the rear door. Signs will be posted for guidance.

If you fly in, land at KFDK and tell ground control you want to taxi to parking for the MDRFF.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
